1 Task 3: Modelling Budgets and Downside Risk

1.1 Introduction

[Explain the two financial planning questions.]

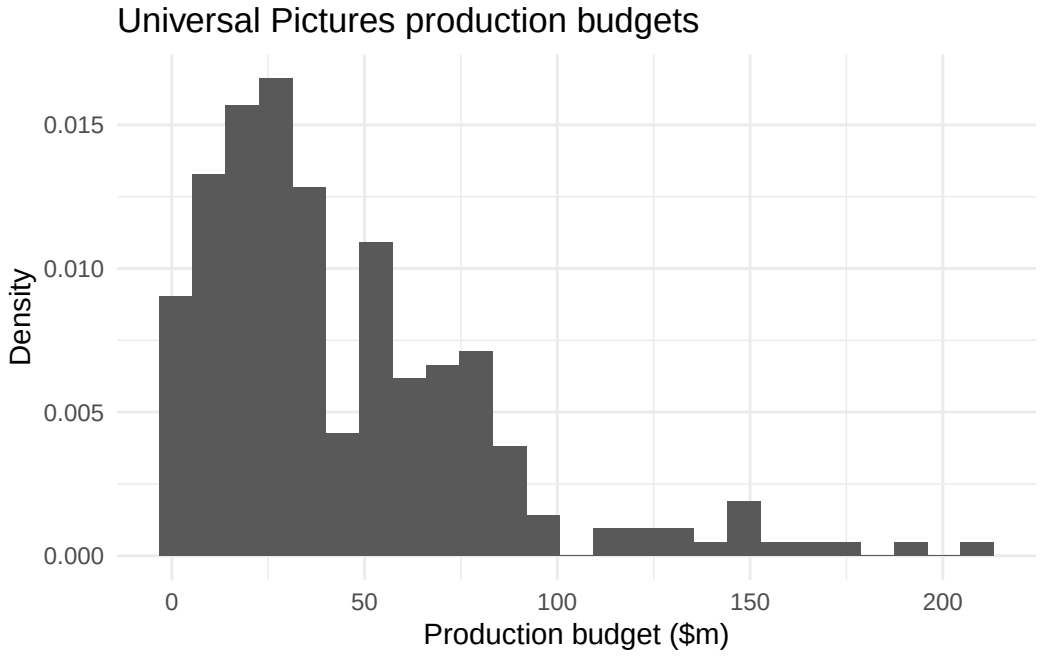

1.2 Universal Pictures Budget Modelling

1.3 Universal Pictures Budget Modelling

[Document the distributions considered.]

Table 1: Distributions fitted to Universal Pictures budgets, ordered by AIC (lowest first)

Distribution	Parameters (units)	Estimate 1	Estimate 2	Log-likelihood	AIC
Gamma	shape, rate (per $m)	1.382	0.031	-1,158.1	2,320.1
Weibull	shape, scale ($m)	1.214	47.479	-1,158.3	2,320.6
Log-normal	meanlog, sdlog (log $m)	3.392	1.015	-1,172.6	2,349.2
Normal	mean, sd ($m)	44.481	37.432	-1,225.1	2,454.1

1.4 Model Diagnostics and Comparison

1.5 Action Genre Downside Risk

[Document your percentile estimation methods.]

1.6 Comparison of Interval Estimates

[Compare methods, assumptions and findings.]

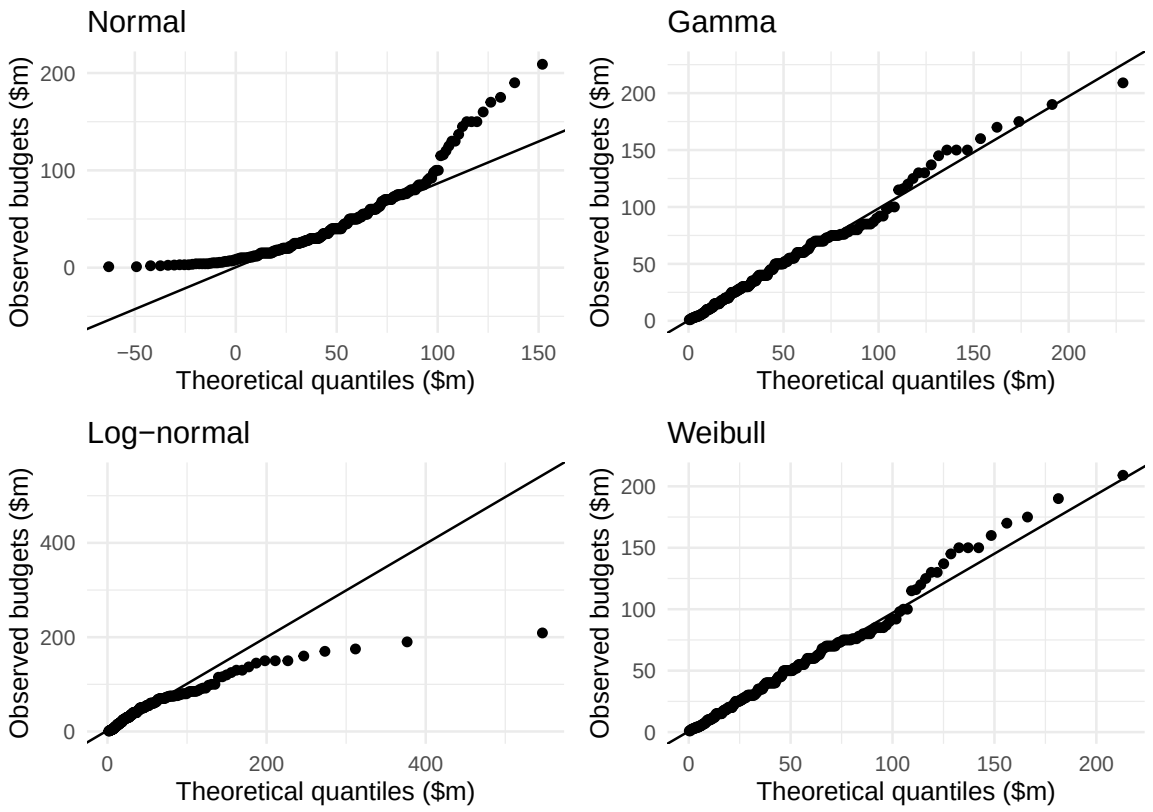

Figure 1: Q-Q plots of Universal Pictures budgets against each fitted distribution. Points close to the line indicate a good fit.

1.7 Summary for the Finance Team

[Summarise the implications in plain language.]
